

Shenzhen Visuallumen Co.,Ltd, a global LED technology company and manufactory, offers user-friendly imaging products, the company is recognized worldwide in its industry as the leading designer and manufacturer of LED display, programmable display systems, and large screen video displays & Lighting using light emitting diode (LED) technology.

With 5 anti-static dust automatic production lines and leading production technologies, zero manual soldering, we use the latest automatic irrigation machines, wave soldering, reflow soldering, SMT and automatic DIP plug-in machines, which ensure high quality products and fast delivery to all over the world, lasting cooperation with famous material suppliers like Cree, Nichia, Epistar, Opto, Silan and Sanan etc, bring us not only stable and high quality products, but also good price.

We're also the OEM & ODM factory of many famous LED factories in overseas, which bring us lots of directly local experience all over the world, with our 50 R&D engineers hard working, we are keeping our design as leading in the market, also compatible to each other, easy to update. We have more than 20 professional post sale engineers to support all our projects all over the world in 7 x 24 hours.

As a manufacturer and technical contractor, Visuallumen provides standard display products as well as custom-designed and integrated systems. The company excels in the control of large display systems, including those that require integration of complex multiple displays showing real time information, graphics, animation and video.

Visuallumen has experienced significant growth over the past years but the values this company was built on remain its constant foundation.

Our solutions come from your idea.

Once we start cooperation, our cooperation will be lasting.
